Cut out your creatures and build your ocean!

Cut out your creatures and build your ocean!

Build an Ocean Scene!

Create your own underwater world by cutting and pasting ocean animals onto a sea background. Choose color or black-and-white and glue in!

What You'll Need

- Ocean background page (color or black-and-white)
- Ocean animal cutout sheet (color or black-and-white)
- Scissors
- Glue stick
- Crayons or colored pencils (coloring)

Step-by-Step Instructions

1. Choose your version.
Pick between the full-color version or black-and-white to cut out yours.
2. Cut out the ocean animals.
Cut along the dashed line around each animal carefully.
3. Arrange your scene.
Arrange your animals on the background page and decide where each one will go.
4. Glue them down.
Once you're happy with the placement, glue each one into place.
5. Add your own details!

Fun Ideas

Literacy

- Write a sentence or story about your ocean.
- Example: "A jellyfish swims by the coral reef."
- Label each animal with its name.

Science

- Sort the creatures by type: fish, invertebrate, mammal.
- Research one ocean animal and share a fun fact.

Math

- Count the animals in your ocean scene.
- Create a graph of the class's favorite ocean animals.
