What are Domestic Animals?

Domestic animals are animals that live with people. They are friendly and help us in many ways, like giving us food, wool, or keeping us company. Some of them live on farms, and others live in our homes.

Fun Facts About Domestic Animals:

1. Dogs are known as "man's best friend" because they are so loyal!
2. Cats love to chase things, especially string or small toys.
3. Cows give us milk that we can drink or turn into cheese and butter.
4. Chickens lay eggs, which we can eat for breakfast!
5. Horses are very strong and can help pull heavy things or give people rides.

What are Wild Animals?

Wild animals are animals that live in nature, like forests, jungles, deserts, or oceans. They don't live with people, and they find their own food. These animals are usually seen in the wild or at the zoo.

Fun Facts About Wild Animals:

1. Lions are called the "king of the jungle" because they are strong and brave.
2. Elephants have long trunks that help them pick up food or spray water.
3. Monkeys love to swing in trees using their long arms and tails.
4. Tigers have beautiful orange fur with black stripes to help them hide in tall grass.
5. Dolphins are super smart and love to play in the ocean with their friends.
