Cut out your creatures and build your ocean!

Use Your Village

Build an Ocean Scene!

Create your own underwater world by cutting and pasting ocean animals onto a sea background. Choose color or black-and-white and dive in!

What You'll Need

- Ocean background page (color or black-and-white)
- Ocean animal cutout sheet (color or black-and-white)
- Scissors
- Glue stick
- Crayons or colored pencils for coloring

Step-by-Step Instructions

1. Choose your version
   Pick between the full-color version or black-and-white to color yourself.
2. Cut out the ocean animals
   Cut along the dashed lines around each animal carefully.
3. Arrange your scene
   Place your animals on the background page and decide where each one will go.
4. Glue them down
   Once you're happy with the placement, glue each one into place.
5. Add your own details!

Extension Ideas

Literacy

- Write a sentence or story about your ocean.
- Example: "A jellyfish swims by the coral reef."
- Label each animal with its name.

Science

- Sort the creatures by type: fish, invertebrate, mammal.
- Research one ocean animal and share a fun fact.

Math

- Count the animals in your ocean scene.
- Create a graph of the class's favorite ocean animals.
